

## Fern's offices are closed today 20 September 2019 in solidarity with the **#GlobalStrike4Climate**

The Climate Crisis is real and we're already seeing the effects. Our hotter planet is hurting millions of people, affecting our weather, water, forests, cities, homes, and wildlife.

Since #Fridays4Future started last summer, the UK, Canada, Ireland and France have declared a #ClimateEmergency, but has yet to act. We must end the cutting and burning of forests for agriculture, and the subsidies and policies that support oil, coal and gas companies to pour fuel on the fire.

We have only one ask. For the UN to come up with a just climate plan that responds to the scientific reality. This means stopping deforestation, transitioning fairly and swiftly to 100 per cent renewable energy, and restoring our natural forests.

Join us on the streets and pledge to keep striving for climate justice in the years ahead.
